

70 cm B_Free built-in hob

4 induction zones

1PBF7ID

Description

- extra-thick AISI 304 stainless steel
- functions: power management, Bridge, Booster, selective pan detection, automatic preheating, keep warm
- safety devices: electronic child-safety lock, residual heat indicator, safety switch-off
- minimum pan diameter: \varnothing 110 mm
- adjustable power levels: 1.6 - 2.0
- - 2.8 - 3.5 - 4.3 - 5 - 5.5 - 6 - 7.4 kW
- maximum absorbed power: 7.4 kW
- 66.5x49.5 cm cut out

Induction zone power:

- 4 Octa zones: 2.1-3 kW (*)
- (*) with Booster function

Plus

Detailed Features

Induction

With induction technology, heat is generated only on the base of the pan and transferred directly to the food. With an efficiency rate of 90%, cooking times are greatly reduced. The hob surface remains cool, offering enhanced safety and ease of cleaning.

Power limiter

This function allows users to set the maximum power level the hob can absorb, helping to prevent electrical overloads.

Bridge function

Allows two adjacent cooking zones to be combined, expanding the usable surface area. Ideal for large cookware.

Booster function

This function reduces cooking time by boosting the selected zone to maximum power, especially useful for heating large amounts of liquid.

Selective pan detection

The induction plate only operates when it detects metallic cookware of suitable size, preventing activation by other objects.

Child safety lock

Prevents accidental changes to the hob settings, particularly by children.

Residual heat indicator

An "H" on the display indicates residual heat on the hob, caused by heat reflected from the cookware.

Automatic safety shut-off

After a set period at a given power level, the hob automatically switches off to prevent risks from user oversight.

AISI 304 stainless steel

Barazza products are made of high-quality AISI 304 stainless steel, which guarantees resistance to stress, long-lasting durability and ease of cleaning.

Extra-thick AISI 304 stainless steel

Barazza uses thick AISI 304 stainless steel, which is fully recyclable, corrosion-resistant, durable and highly hygienic.

Stainless steel knobs

Made of stainless steel, Barazza hob knobs are robust, pleasant to the touch and allow smooth, precise power regulation for burners or induction zones.

Module width 70

Barazza hobs are available in various widths designed to fit the most common standard kitchen unit modules.

Keep Warm function

Sets the power level between 0 and 1, allowing food to be kept warm without the risk of burning.

Automatic preheating function

Allows the zone to reach temperature faster: after selecting a power level, the zone heats at maximum output for a preset time before stabilising at the chosen level.

Installations

Installation Method

SQEB

Square edge built-in

The folded edge rests on the worktop.
