## Detailed Features

Extra-thick AISI 304 stainless steel

Barazza uses thick AISI 304 stainless steel, which is fully recyclable, corrosion-resistant, durable and highly hygienic.

Cast iron pan supports

Made of cast iron, like those used in professional kitchens, they are particularly solid, heat-resistant, durable, and able to retain and distribute heat more effectively.

Stainless steel knobs

Made of stainless steel, Barazza hob knobs are robust, pleasant to the touch and allow smooth, precise power regulation for burners or induction zones.

Double crown burner 3.5 kW

Two high-efficiency flame rings, with centrally directed flame, optimise the 3.5 kW output for fast, even cooking.

AISI 316 stainless steel

Elements made of AISI 316 stainless steel, a fully recyclable, durable and highly hygienic material, extremely resistant to weather and salt.

Battery Power On

It is possible to turn on the hob without it necessarily being connected to the mains

# Installations

## Installation Method

Freestanding Thalass

Total freedom of placement for a versatile, high-performance outdoor kitchen, with no need for built-in installation.
